PROJECTS

FitLife – AI-Powered Fitness Tracking Platform (Spring Boot & React) [↗](#)

- Built an **end-to-end microservices-based fitness tracking platform** integrating **Spring Boot**, **React.js**, and **Kafka** for asynchronous event-driven communication.
- Designed **RESTful APIs** across modular services - User, Activity, and AI Recommendation - achieving seamless data exchange and scalability.
- Implemented **JWT and OAuth2 authentication** using **Keycloak**, ensuring secure user management and reducing authentication errors by **95%**.
- Integrated **Gemini AI APIs** for personalized fitness insights and real-time activity recommendations, improving user engagement by **40%**.
- Optimized **database performance** using PostgreSQL and MongoDB, achieving up to **30% faster query execution**.
- Utilized **Spring Cloud Config**, **Eureka**, and **API Gateway** for centralized configuration, service discovery, and load balancing.

Password Manager Web App [↗](#)

- Developed a secure and responsive password manager using **React.js**, **Tailwind CSS**, and **MongoDB**.
- Implemented full CRUD functionality to **add, view, edit, and delete passwords** for various websites.
- Used **Lordicon's animated icons** to enhance UI/UX and improve interaction quality.
- Built backend-integrated versions of the app using component-based architecture.
- Created reusable UI components like **Navbar**, **Manager**, and modal dialogs.

Personal Portfolio [↗](#)

- Developed a responsive personal portfolio website using **HTML**, **Tailwind CSS**, and **JavaScript**.
- Integrated social links to **GitHub**, **LinkedIn**, and live project previews to boost professional presence.
